DMC Fabrication Inc. is a family run business, owned and operated by Dan and Cindy McCracken.

Starting in 1992, *DMC* has evolved from custom food equipment manufacturing to a world-renowned metal fabrication business. *DMC* is a 'concept to reality' fabrication company, specializing in stainless steel.

With over 25 years experience in the fabrication business, Dan McCracken has an exceptional ability to design and produce distinctive products. These unique and award winning designs are second to none, in their craftsmanship and aesthetics.

By utilizing a 3M technology and the everlasting beauty of stainless steel, *DMC* is able to create a whole new median for their customers. This newly found niche has led them to a world of stainless steel signage; from White Oaks Conference and Spa and Royal Niagara Golf Course to the many city and towns along the way, *DMC* has provided their customers with superior and long lasting products.

DMC takes pride in their quality and workmanship while creating their designs. Their only one of a kind creativity and dedication has led to a successful and highly regarded business.

DMC Fabrication Inc. will work with you through the planning stages to ensure that all your product requirements are understood and fulfilled.

From the first raw concept in the minds of *DMC's* client (like yourself), *DMC* will help obtain a quality product at a competitive price. This partnership-building approach results in superior product development and customer satisfaction.
